Commonwealth of Massachusetts.

INSURANCE DEPARTMENT, BOSTON, May 8, 1891.

To the Honorable Senate and House of Representatives.

Herewith is submitted, in compliance with the requirements of the statute, Part II. of the thirty-sixth annual report of this department relating to life and casualty insurance, and containing also abstracts from the reports of the assessment, fraternal beneficiary and assessment endowment corporations.

FIXED PREMIUM LIFE INSURANCE.

The record of 1890 shows a large increase, although the ratio of gain did not equal the phenomenal figures of the previous year. The substantial growth, however, will be seen by the following summary of the business of the companies transacting business in Massachusetts:—

		1889.	1890.
Policies issued during the year, .		237,539	265,164
Amount issued,		\$758,152,459	\$830,460,272
Policies in force at close,		1,094,601	1,213,442
Amount in force,		\$3,064,711,768	\$3,432,602,890
Gain in number of policies, .		114,087	122,658
Gain in amount,		\$371,670,792	\$370,365,850

These aggregates do not include 2,506,554 industrial policies, covering \$277,793,527 of insurance of the three companies engaged in this branch of business.

The number of companies has been changed only by the withdrawal of the Vermont Life.

The gross income of all of the companies was nearly nineteen millions greater than in the previous year, while the gross expenditures were increased not quite twelve millions. The gross assets were increased \$51,697,039. The aggregate surplus, as regards general and special policy-holders, shows an increase during the year. The total payments to policy-holders reached the sum of \$84,537,112, while the entire amount of dividends to stockholders was \$357,247.

THE MASSACHUSETTS COMPANIES.

The five companies of this Commonwealth had altogether a prosperous year. The results show an increase even greater than during the year previous, their gain being 6,430 policies, covering \$20,418,306. At the close of the year these companies had in force, not including the industrial business of the John Hancock, 80,960 policies and \$220,739,343 in insurance; the amount paid to policy-holders was \$5,955,220. During the year the triennial examination required by law was made of the Massachusetts Mutual and State Mutual. The result was in every respect satisfactory, the securities being of unquestioned value and the methods of business such as command approval and commend to confidence.

BUSINESS IN MASSACHUSETTS.

Excluding the industrial business, there were written on Massachusetts lives, during the year, 13,603 policies, covering \$36,380,401, an increase over the figures of the previous year; of these, 3,130 policies, amounting to \$8,126,912, were written by the Massachusetts companies. At the close of the year there were in force on Massachusetts lives 79,870 policies, covering \$222,464,435; a little more than one-fourth of this business is in our domestic companies. Massachusetts claims were paid during the year to the amount of \$3,643,929, of which \$954,880 was by our home companies.

THE INDUSTRIAL BUSINESS.

The growth of this branch of the business of life insurance has exceeded even the swift increase of previous years; the following table shows the results of 1889 and 1890 in comparison:—

		1	889.1	1:	890.
		Policies.	Amount.	Policies.	Amount.
John Hancock,		320,264	\$36,365,419	402,147	\$45,772,709
Metropolitan,		1,849,113	200,829,929	2,096,595	231,115,440
Germania, .		8,276	947,704	7,812	905,378
Total, .	. 1	2,177,653	\$238,143,052	2,506,554	\$277,793,527

The following shows the business in force in Massachusetts of the John Hancock and Metropolitan at the end of the year:—

Industrial Business in Massachusetts.

	1	889.	18	90.
	Policies.	Amount.	Policles.	Amount.
John Hancock, .	44,132	\$5,011,189	61,424	\$ 6,991,280
Metropolitan, .	171,188	18,592,532	191,888	21,152,525
Total,	215,320	\$23,603,721	253,312	\$28,143,805

It will be seen that the industrial policies of the John Hancock average \$115 in amount and those of the Metropolitan \$123.6. The former company paid last year for losses in Massachusetts \$37,251, and the latter \$84,032 more than in 1889.

During the session of the Legislature the present year an order was presented and considered by the insurance committee, looking to the restriction of insurance upon infantile lives and the forbidding of insurance upon any life without the knowledge of the person insured. It was shown, however, that the companies now use every precaution to prevent the latter, and it did not appear that under the practices of the companies engaging therein additional safeguards against imposition nor in the line of a better public policy could well be applied to the former, and the report of the committee, "inexpedient to legislate," was accepted without dissent.

In this connection, however, the commissioner would repeat and emphasize the suggestion, twice before made in these reports, that when any company effects insurance upon a life, without medical examination, it should be forbidden from setting up, as a bar to any claim, alleged misrepresentation by the insured as to his family history or his physical condition at the time the policy was issued; and further, the burden of proof of age at the time the policy was issued should not be upon the claimants in any case where medical examination is omitted. Doubtless four-fifths of the misunderstanding, disappointment and loss in this class of business, now grown to vast magnitude, arise from these grave defects in industrial methods, which ought to be speedily and radically remedied.

The provision as to the size of type attaching to the standard fire policy ought to be made applicable to these applications, and to all provisions of the policy in any degree modifying or controlling the contract of industrial life insurance. Important restrictions, in many instances reducing by one-half the amount written in the policy, ought not to be permitted when printed in type so small as to be almost invisible to the naked eye; it is difficult to perceive why this should be forbidden in the case of a fire policy and permitted, as at present, in these contracts of vastly greater consequence.

ASSESSMENT INSURANCE.

The tendency towards consolidation continues among the business assessment corporations, — practically only four of the death benefit organizations remaining in the Commonwealth, and two of these having a comparatively small membership; the other two are increasing in numbers and indicate an apparently healthy condition. The last Legislature enacted a new statute governing this business, making provision for the return to members of a portion of the emergency fund when the latter was in excess of the amount of two assessments upon the entire membership.

The Massachusetts statute defines assessment insurance as benefit contracts conditional "not upon fixed payments" but upon the collection "from time to time" of assessments. It is to be regretted that some assessment corporations of other States have issued certificates and explanatory literature in which the assessment feature is so cleverly disguised that the ordinary reader would easily, indeed naturally, be led to believe that he was securing a fixed premium policy, no one but an expert being able to discover the unlimited assessment feature hidden in some obscure paragraph. There is no question that this is contrary to the spirit of the law, and it ought to be therein expressly prohibited. It is only just to the public that the insured should in all cases have it made clear and plain what class of insurance is presented to him, and then allow him to intelligently choose for himself, and there ought to be no sailing under a false flag.

During the year quite a list of assessment corporations have closed their affairs: the New England Relief Association of Boston transferred most of its members to the Massachusetts Benefit Association; the Fraternal Accident Association of the Improved Order of Red Men of Clinton voted in January, 1890, to close business and to apply for a receiver; the Young Men's Relief Association of Westfield and the Life and Casualty Assurance Association of Boston have also ceased to exist. Of foreign corporations, the Life and Reserve Association of Buffalo withdrew from Massachusetts, and the Ohio Valley Life Company transferred its members to the Life-Maturity Company of West Virginia.

Of the fraternals, the Odd Fellows Mutual Relief Association of Cambridge transferred its members to the Odd Fellows Protective Union. The following have ceased business: Odd Fellows National Health and Accident Association, Westfield; Boston Relief Association of the United Order of the Golden Cross, Boston; Independent Order of American Hebrews, Boston; R. W. Grand Council Independent Order of Mystic Brothers, Boston; Sons of Veterans Association, Lowell; St. Joseph Union, Wayland; Zylonite Benefit Association, Adams. The two last-named corporations were formed in 1890, and closed their affairs before making any report.

THE DISSOLVING ASSESSMENT CORPORATIONS.

Since the last report the receiver of the Massachusetts Safety Fund Association, Charles Robinson, has submitted a supplementary report of the affairs of this corporation, showing that of the amount previously ordered by the court paid to con-

tributors there remains uncalled for \$144.64. Additional claims have been proven to the amount of \$2,040, upon which the court ordered paid a dividend of 128 per cent., amounting to \$2,611.20, the receiver to hold the remaining \$721.28 of the fund for future distribution as claims might be proven. There was also in the hands of the receiver \$386.60, being the accretions of the fund, which the receiver was allowed for services. The receiver was directed to make a further report at the expiration of six months from March 14, 1891, the date of the decree.

In the matter of the Massachusetts Standard Benefit Company, the receiver, Geo. L. Huntress, filed his final account April 27, 1891, showing that under decree of the court of Oct. 1, 1890, he had paid a dividend of 22 per cent. to six claimants, with sundry minor expenses amounting to \$400.72, the entire sum in his hands, and the receivership was closed.

The final report of Geo. M. Stearns, receiver of the Equitable Mutual Relief Society, was filed in the supreme court April 9, 1890, and a decree made closing the business of the corporation. The funds in the hands of the receiver had grown by accretions to \$7,679, from which payments for costs and receiver's services were made to the amount of \$983, and the balance paid pro rata upon ten claims allowed, being \$6,696.

The affairs of the United States Mutual Accident Association were closed during last year, by decree of the court, a dividend of 88 per cent. being paid on claims allowed.

THE ENDOWMENT AND BOND CRAZE.

It is doubtful if, since the famous South Sea bubble, such a gambling mania has seized an intelligent people as that developed in the spread of the assessment endowment and its natural and legitimate offspring, — the bond investment insanity. The predicted immediate result of the growth of the former is seen in a marked degree in the small increase in membership of the fraternal associations which pay only death and disability assessments, which, indeed, have been brought very nearly to a stand-still through the fierce rivalry of corporations whose plans are only an exemplification of that miraculous scheme of finance underlying the now disrupted bank of the notorious Mrs. Howe, and it is not clear that the Commonwealth, after granting its broad seal to the charters of the assessment endowment

corporations, ought not in fairness to make reparation and apology to Mrs. Howe for destroying her pet institution of finance. Step by step the managers of these institutions are themselves justifying the criticisms originally made by this department upon the plan of operations. In the original statute, formed just as the promoters of the scheme desired, twenty per cent. of assessments was the amount fixed for the reserve fund. Last winter the officers came to the Legislature confessing failure on this basis, asking that the limit for the reserve be raised to fifty per cent.; this was done, and just one year later the demand was made for a still higher limit, and the original twenty is about to be increased to eighty-five per cent. In this connection it is interesting to recall some of the predictions made as to the pioneer of these corporations, - the Iron Hall, - when it was seeking, three years ago, legislation to legalize its existence in Massachusetts. In reply to statistics by the insurance commissioner demonstrating the absurdity of its pretensions, that corporation presented to the Legislature an elaborate computation, showing its anticipated increase of membership, lapses and payments through a series of years. A comparison of these predictions with the actual results, as shown by its reports, demonstrates that it is safer to prophesy after you know. In this printed statement the increase in membership during 1890 is estimated at 24,781; it actually was but 8,041. The total membership at the close of same year was estimated, deducting lapses, at 74,343; it actually was but 53,906. The terminations by lapse during 1890 were estimated at 8,260; the actual number was 2,897. And as an illustration of how little the officers of this corporation know as to the actual condition of its affairs, the number of maturing certificates during 1890, the simplest matter of book-keeping, is in this pamphlet stated to be 794, when the report to this department shows the number actually paid to have been 898, an excess in payments of \$104,000, less advances made on account of sickness, and this, like all of the discrepancies, against the corporation. The number of assessments necessary to be made in 1890 to successfully carry out the scheme was stated in this official pronunciamento to be twelve; in fact, the corporation did levy eighteen, just fifty per cent. increase in cost over its own prophetic exposition of "The Problem Solved." These

figures from its own official reports are the best possible confirmation of the declaration three years ago, and since, of this department, that the scheme of the Iron Hall, as presented, was morally wrong and mathematically impossible.

The accompanying tables from the annual reports show the membership, the collections for the benefit and endowment fund, the deposit with the treasurer of the Commonwealth, the amount collected for expenses, and the expenditures of all the Massachusetts assessment endowment corporations to the close of the year 1890. A comparison of the collections for the endowment fund and for expenses of some of these companies will prove more instructive than pleasing reading for the certificate holders. In the aggregate it will be seen that to place \$1,363,392 in the endowment fund cost the membership an additional \$1,286,754; that is, the certificate holders have thus far paid nearly two dollars to get one into the fund, from which they expect to realize about three dollars for one.

The Legislature, at the last session, wisely declared by statute that no more of these corporations should be chartered. On the date when this law took effect fifty-four charters had been granted; of these, three have either not begun or early discontinued business, and one corporation organized to transact a death and disability business has since engrafted an endowment feature, leaving fifty-two Massachusetts and two foreign corporations now issuing these certificates. The public greed for quick realization of anticipated profits led to the cutting down of the term for which certificates were issued by different corporations to five years, then three, two, one, and finally six months. While, naturally, the lapse element — a phase which Massachusetts thirty years ago declared vicious and immoral and prohibited by statute, lapse which is simply the confiscation of the cash of another - will be somewhat greater among the membership holding certificates for a long term than in those of the shorter period, it has been shown from actual experience how trifling this is as an element of accretion, and the principle, or want of principle, is precisely the same in a six month as in a ten year corporation, the grotesqueness of the scheme differing only in degree. An attempt has been made to practically nullify the statute forbidding the granting of additional charters through the engrafting, by some of the existing corporations, of new features upon the plans in operation by them when the law was passed. A number of long term corporations, perceiving the present popularity of the short term features, attempted to add one or more series of certificates of this class; while the officers of several of the companies issuing short term certificates, seeing the impending doom, sought to lengthen out their official lives, and incidentally to continue their salaries, by engrafting a series of certificates for a long term. The attorney-general rendered to the department an opinion that this was unlawful under the statute, and the bill now pending in the Legislature expressly prohibits the procedure.

No end of chatter has been made in connection with the schemes of these corporations as to the profit to arise from lapses. In previous reports the morality, the honesty of the lapse question, which is simply confiscation, has been discussed, but the figures show that it is of very little moment in determining the possibility of the fulfilment of the promises of these corporations. During the last year the entire lapse of the long term corporations — five years and over — was but 9.5 per cent.; in this lapse list, however, were six companies whose members were subject to a "freezing out" process, a membership of 1,760 being reduced to 112; deducting these, which cannot fairly be considered, the lapse loss was but 6.4 per cent. In the three year organizations the lapse fell to 5.9 per cent., and in those with shorter terms to 2.7 per cent. As a large proportion of these lapses were of those who had held membership for only a short period, and paid but a small amount into the treasury, the trivial character of the lapse factor is readily seen.

THE WILD CATS FROM OTHER STATES.

Within a few months a brood of corporations organized under the laws of Maine, Virginia, West Virginia and New Hampshire, mainly the latter State, have come into Massachusetts, and, availing themselves of the provision of a general statute, have filed with the commissioner of corporations copies of their acts of incorporation; and thereupon, without license or provision of law, began the sale of so-called 'bond investment' certificates, promising a payment either in the order of their numbers, as speedily as the money was received from assessments, or at the end of fixed periods, the latter generally six months or one year. No one is able to say that the statutes of either of the States where these concerns were hatched authorize the business they transact here; indeed one State has expressly declared such transactions unlawful, the supreme court having previously declared such corporations to be gambling concerns and forbidden by the statute. The officers of these corporations are generally unknown to the public; there is nothing to establish their right to confidence; the companies are nowhere under the slightest official supervision or restriction; the officers use or invest the funds according to their own will and pleasure; there is usually no disability or death benefits, no pretence of fraternal features, the entire scheme being based upon pure personal speculation, - gambling upon the chance of getting in early enough to get out among the first, regardless of the chance which comes to the unfortunate later and larger contingent. Yet tens, probably hundreds, of thousands of these wild-cat certificates of irresponsible concerns have been eagerly purchased by citizens of Massachusetts, until the payments upon these, and the membership in the endowment orders of this Commonwealth, have led to a serious interference with business throughout the State, and to a general demoralization of the sentiment of the masses of the people, through the inculcation of a belief that there is in these "million-in-a-minute" concerns a royal road to fortune, and that, after all, basal financial facts are to be overturned and money acquired through some easier and quicker method than legitimately earning it. A conservative estimate shows that these corporations altogether have already collected more than seven millions of dollars. The bills pending in the Legislature would relieve the Commonwealth of this entire bastard brood by declaring their further transactions in Massachusetts unlawful.

Respectfully submitted,

GEO. S. MERRILL,

Insurance Commissioner.

^{*} The charter, besides authority to transact a life insurance business, confers also authority to act as administrator, executor, etc., to transact what is known as a trust business. The relations of the two departments of the business are fixed by the provisions of the charter. The accounts are kept entirely distinct and separate. The entire surplus in the insurance department accumulates for the benefit of the policy-holders. The only advantage, direct or indirect, which the stockholders can at any time have from the union of the two features of the business results from the fact that the management of the trust business, from which they derive their profits, is done for them without charge. This includes the interest on the capital.
